# It's beginning to heat up

SUBMITTED PHOTO 21 hrs ago

Suburban Propane recently installed 12 120-gallon propane tanks at Six Flags in Largo and another 12 120-gallon propane tanks at Regency Stadium in Waldorf to provide heat for the COVID-19 vaccination efforts taking place at each location. Staff from Suburban Propane's Millersville Customer Service Center completed the installation at Six Flags testing/vaccination site, while staff from the Waldorf Customer Service Center completed Regency Stadium site. Each site has three large tents with two drive-thrus, so each tent received four 120-gallon propane tanks to provide heat for staff and vaccine recipients.
